- (57) 1. A shaft having an operating end and a cleaning end;
a plate having a shaft side and a cleaning side and being pivotally connected to said shaft at said cleaning end;
a liquid absorbent member disposed on the cleaning side of said plate;
and a wringing mechanism with a wringing handle disposed on shaft and
being movable with respect thereto; and
a wringer connected to said wringing handle and covering said plate and
compressing said liquid absorbent member to said plate.
